PREPARED FOR

Sample Platform team

SAMPLE PLATFORM · SYNTHETIC ·
2026-08-20

ENTRY POINT

Synthetic evaluation start page

SEVERITY BASIS

Ability to choose an option with
confidence

Punchlist · Independent experience review

SAMPLE-PLATFORM-FIRST-WORKFLOW-REPORT

From arrival to action

01 · ARRIVE

The evaluator opens the synthetic start page.

02 · COMPARE

The evaluator compares options before committing.

03 · START

The evaluator chooses an option and starts the core workflow.

LEAD FINDINGS

What most affects the journey

Details are hard to read while comparing options.

F-FC11114007DF

The option detail text is hard to distinguish from its card background.

vanishing-ink · decision screen

RENDERED EVIDENCE NOTE

A rendered comparison probe confirms that the detail text remains visually indistinct from its card background.

RENDERED · SYNTHETIC · PROV-SYNTHETIC-SURFACE

Selection details disappear during comparison.

F-6231265220AC

The evaluator must remember a selected option while comparing it elsewhere.

recall-tax · option list → comparison view

RENDERED EVIDENCE NOTE

A rendered comparison probe confirms that the selected option summary is absent from the comparison view.

RENDERED · SYNTHETIC · PROV-SYNTHETIC-SURFACE

RECALL-TAX 1

VANISHING-INK 1

STRENGTHS

What supports progress

- The synthetic entry point names the next step clearly.

RECOMMENDATIONS

Make the next comparison easier

RECOMMENDATION-CONTRAST · VANISHING-INK

Increase detail-text contrast on comparison cards.

RECOMMENDATION-MEMORY · RECALL-TAX

Persist the selected option summary through comparison.

NEXT TEST

Observe first-time evaluators comparing two synthetic options.

COVERS: VANISHING-INK, RECALL-TAX

Canonical records and limits

Findings

vanishing-ink		F-FC11114007DF
SYMPTOM	SURFACE	
The option detail text is hard to distinguish from its card background.	decision screen	
LOCATOR	VERIFIED	
primary comparison card	rendered	
STANDARD	REFERENCES	
Legible	1.4.3 Contrast Minimum (AA); 1.4.11 Non-text Contrast (AA)	
EVIDENCE		
◦ RENDERED: A rendered comparison probe confirms that the detail text remains visually indistinct from its card background. SYNTHETIC RENDERED PROBE		

recall-tax		F-6231265220AC
SYMPTOM	SURFACE	
The evaluator must remember a selected option while comparing it elsewhere.	option list → comparison view	
LOCATOR	VERIFIED	
selected option summary	rendered	
STANDARD	REFERENCES	
Discoverable	NN/g #6 Recognition rather than recall (Jakob Nielsen, nngroup.com/articles/ten-usability-heuristics/); Shneiderman #8 Reduce short-term memory load	
EVIDENCE		
◦ RENDERED: A rendered comparison probe confirms that the selected option summary is absent from the comparison view. SYNTHETIC RENDERED PROBE		

Evidence gaps

g-synthetic-recovery
Synthetic evidence does not cover recovery after an interrupted comparison.

Not assessed

tint-on-tint-trap

The synthetic fixture omits the rendered token values required for this eligible comparison.

Capture the rendered foreground and background token values.
